— A HAVELLS Brand —

— LLOYD —
LUXURIA
Collection

EXQUISITE RANGE OF DESIGNER ACs FROM THE HOUSE OF LLOYD

LUXURIA

Collection

Welcome to the **Lloyd Luxuria Collection**, where air conditioning meets artistry and next-gen technology. Our designer ACs—**Stunnair, Masterpiece, Stellar, and Stylus**—are more than just cooling solutions; they are masterpieces that elevate your living space, seamlessly blending with the décor and adding a touch of elegance to any room. The AI Smart technology within each unit delivers intelligent comfort, precisely adapting to your preferences and environment.

Lloyd Luxuria Collection — a symphony of elegance, innovation, and unmatched performance—tailored to enhance every aspect of your home with futuristic refinement.

STUNNAIR

Introducing **Stunnair**, a bold addition to our designer lineup, crafted to leave an unforgettable impression. With a design that captivates, Stunnair redefines luxury by merging high-performance cooling with AI-driven intelligence for an elevated experience.

Equipped with AI Smart and a few 1st in Industry features, Stunnair intuitively adapts to your environment, optimizing airflow, temperature, and energy use on a real-time basis. This fusion of AI-enhanced performance and stunning aesthetics ensures a seamless blend of comfort, efficiency, and style, making Stunnair a true masterpiece in luxury air conditioning.

masterpiece

COOL EVERY CORNER WITH EASE.
DISCOVER LLOYD'S WINDOW TOP THROW INVERTER AC.

Engineered to provide a next-level cooling experience, robust performance while maintaining energy efficiency, Lloyd's Masterpiece delivers uniform cooling with its new top air discharge. This power-packed Wi-Fi AC comes with amazing features like Opti-Breeze, Quiet Operation, Wider Air Throw, Feather Touch Control, making it perfectly suitable for any apartment, office, or bedroom, this model seamlessly combines next-gen technology, powerful cooling, and long-lasting durability in a sleek and modern design.

STELAR

Industry's first Designer AC and our most admired model enhance its range further with the addition of all-new Stellar DUO, Stellar ART & Stellar GRACE models this year, crafted with perfection to offer amazing cooling and timeless design.

Stylus

Industry's first AC with a changeable fascia, allows you to personalize the look to match your style & home interiors / décor. It's the ultimate fusion of functionality and customization, giving you the freedom to refresh your space with ease.

Disclaimers:
Images are for representation only; actual product may vary from the image shown. Features explained may vary from model to model; for exact feature details of a model please refer to Specifications Sheet.

INTRODUCING STUNNAIR BY LLOYD

Redefining Air Care

In a rapidly evolving India, Lloyd envisions going beyond traditional cooling to deliver a comprehensive 360° air-care experience. With AI-powered innovation, Stunnair sets a new benchmark in the AC market, where intelligent technology meets impactful design to enhance both brand imagery and customer experience. Through AI-driven first-in-Industry features, Stunnair intuitively responds to the environment, automatically adjusting airflow, temperature, and air quality for ultimate comfort. This powerful presence marks a step towards our market leadership in air-care technology.

— LLOYD —
STUNAIR

— LLOYD — STUNAIR

THE DESIGN STORY. TECHNOLOGY MADE SENSORIAL.

Dynamic Tech

Stunnair introduces a sliding fascia with articulating louvers that redefine functionality and aesthetics. When idle, the louver vane remains hidden, allowing for a seamless and sleek appearance. Once activated, the fascia slides up to reveal an elegant display, creating a truly immersive experience.

Luxury in Every Detail

Inspired by fluted, ribbed glass artistry, Stunnair's tinted fascia offers a luxurious, ribbed-glass-like finish. This design element brings a rich texture and sophistication, making it a statement piece in any space.

Sensorial Brilliance

An interactive Ambi-Light responds real-time, bringing a sensorial, aspirational touch that echoes the dynamism of automotive lighting. This feature combines aesthetics with functionality, delivering a captivating air-care experience.

Stylish
Sliding
Fascia

STYLISH SLIDING FASCIA: ELEGANCE IN MOTION

The Sliding Fascia feature transforms the AC experience by articulating the fascia, bringing elegance and modernity into your space. Designed to keep a low profile when turned off, the fascia offers an understated, minimal aesthetic. But when activated, the fascia slides seamlessly, unveiling the full technological prowess hidden within—a subtle yet captivating reveal that enhances any room's ambiance.

ILLUMINATE YOUR SPACE WITH MOOD LIGHTING AND RIBBED ELEGANCE

Taking inspiration from global interior design trends, Stunnair's fascia introduces a sophisticated ribbed effect that transforms your space with understated luxury.

This ripple texture, reminiscent of high-end accent walls, partitions, and deco panels, now enhances your AC, adding elegance and depth. The ribbed surface creates a dynamic interplay of light and shadow, reflecting a refined ambiance.

The Mood Lighting on the Stunnair's fascia enhances the experience, featuring an intelligent, cluster-based LED strip that intuitively responds to essential operations—power on/off, mode adjustments, temperature changes, and swing settings. This interactive lighting display offers real-time feedback for a truly seamless user experience. With the Havells One App, users can personalize the color and intensity of the LED glow to match any mood, creating an elegant, dynamic ambiance that elevates the room. The Stunnair's Mood Lighting isn't just functional; it's a sophisticated, interactive feature that brings a vibrant, personalized touch to your space.

MULTI COLOUR AMBI-LIGHTING

Lloyd's STUNNAIR & STELLAR Air Conditioners come with unique, innovative & interactive features of Ambi-Lighting designed to enhance both comfort and user convenience.

TEMPERATURE BASED AMBI-LIGHTING

Lloyd's Air Conditioners are equipped with stylish multi-color Ambi-Lighting LED strips that elevates the product's and your space's aesthetics to the next level. This dynamic lighting system adds elegance and provides real-time visual indication of room temperature and indoor air quality, elevating the overall user experience.

Off White Ambi-Light :

Indicates that the desired/set temperature has not been achieved.

Light Blue Ambi-Light :

Indicates that the desired/set temperature has been achieved.

Dark Blue Ambi-Light :

Indicates that the AC is working in Turbo Cool mode for faster cooling.

MOOD- BASED AMBI- LIGHTING:

Lloyd's Air Conditioners come with an industry-first Mood-Based Ambi-Lighting feature, allowing users the ability to customize the LED lighting to suit their preferences. Through the Havells One App on their smartphone, users can effortlessly select from a wide range of LED colors, creating an ambiance that matches the feel of the moment. In addition to color customization, this feature also allows for seamless brightness adjustments, from soft and subtle to bright and vibrant, ensuring a personalized, welcoming environment that enhances the overall comfort and atmosphere of the room. Lloyd's Stunnair, Stellar Art & Stellar Grace range of ACs also offer the Mood-Lighting feature even when the AC is in standby mode.

HIGHEST ISEER

REVOLUTIONIZING COOLING WITH LLOYD’S SMART ENGINEERING

Lloyd’s smart proprietary inverter technology and super efficient compressor work together to deliver faster cooling and superior energy efficiency. This innovation helps achieve an **ISEER of 6.5***, which is **16% higher** than the current 5-star benchmark of 2026 ISEER Rating.

UNMATCHED EFFICIENCY IN THE 5-STAR CATEGORY

Lloyd’s high-performance AC models offer an **ISEER of 6.5***—well above the **BEE 5-star requirement of ISEER 5.6**. This means **maximum cooling with minimum energy use**, ensuring the highest efficiency in the 5-star category.

IN INDUSTRY

BENEFITS :

Designed for long hours, ensuring minimal power usage.

Delivers 16% higher efficiency compared to standard 5-star ACs of 2026

Engineered to cut down electricity consumption effectively

Keeps cooling strong even in extreme heat up to 60 °C

1 NIGHT 1 UNIT MODE

Sleep tight, save right.

Enjoy seven hours of uninterrupted cooling while consuming roughly one kilowatt of power. Smart algorithms optimise performance, lower your carbon footprint and reduce electricity bills. Perfect for bedrooms and overnight comfort.

WHAT IT DOES ?

- Ultra-efficient – optimised power usage for energy savings.
- Voltage smart – stable performance even when voltage fluctuates.
- Component care – prevents overload and protects your AC's lifespan.
- Ideal For – Urban homes, and budget-sensitive environments.

HOW IT WORKS ?

Press the '1U' button and your AC locks into energy-efficient settings. Display: '1U' icon appears on unit and on remote 🌙

Set temperature:
predefined

Fan speed:
Pre-optimised

Air swing direction:
predefined

Auto-Exit : '1U' Mode ends automatically after 7 hours & AC returns to the preset mode

IN INDUSTRY

NEW
2026
FEATURE

WHY YOU'LL LOVE IT ?

Save money – lower
electricity bills

Eco-Friendly – reduce
your carbon footprint

Silent sleep – whisper/quiet
operation all night long

Smart cooling – algorithm keeps you
comfortable with minimal energy consumption
and optimum cooling performance.

This feature is available in select models only.

I.N.D.R.I : INDIVIDUAL DETECTION & RANGE IMAGING TECHNOLOGY

Experience the cutting-edge comfort with our I.N.D.R.I Sensor, designed for precise human presence detection, activity recognition, localization, and tracking in front of the air conditioner. This innovative technology enhances your cooling experience by intelligently adjusting airflow and indoor temperature according to the number of people present in the room.

The system offers advanced 3-dimensional motion detection to identify humans up to the range of 5 metres. It intelligently differentiates between human-to-human positions and human-to-non-human movements and elements, ensuring precise monitoring. With the capability to detect up to 5 individuals simultaneously, it provides wider coverage, efficiently monitoring spaces up to 14.8 m² with 120° angle of detection.

AC placed at recommended position for optimum performance of individual detection & range imaging

KEY FEATURES:

Absence Detection

This AI Smart AC senses when the room is unoccupied. If no human presence is detected for 30 minutes, it automatically shifts to the lowest capacity, which further shifts to standby mode if the room remains unoccupied for another 30 minutes, conserving energy efficiently. And it then starts automatically when human presence is detected.

Movement Detection

With real-time detection, AC directs airflow precisely where it's needed, ensuring an optimal cooling experience for the user. **Movement Detection** the system offers advanced 3-dimensional motion detection.

Presence Detection

Equipped with I.N.D.R.I this AC accurately detects human presence, allowing it to adjust dynamically, based on the room's occupancy level.

Activity Detection

The AC intelligently adjusts indoor temperature and airflow based on the number of individuals present in the room, maximizing comfort and energy efficiency.

AI SMART FEATURE: FIND ME / MISS ME TECHNOLOGY

KEY MODES AND FUNCTIONS:

Find Me Mode (Stationary)

Precision-Controlled Airflow: Using INDRI sensors, the AC automatically directs airflow towards the user, providing immediate and focused cooling.

User Detection and Positioning: By identifying the location and number of users, the AC precisely adjusts the airflow to deliver instant comfort where it's needed most, creating a spot cooling effect.

Find Me Mode (Movement)

Temperature-Responsive Airflow: Through human detection, AC tracks the user's movement, adjusting airflow with precision to follow the user and maintain optimal comfort. This mode ensures that the user always receives cool air, even if they move around. Once enabled from the remote, this feature can operate without further manual control.

Miss Me Mode (Stationary)

Indirect Cooling for Enhanced Comfort: Once the AC detects the user's position, it automatically deflects airflow to create a cooler environment without giving direct air exposure to the user. With airflow redirected to surrounding areas, this mode provides a more dispersed, comfortable cooling experience—ideal for users who prefer indirect air.

Miss Me Mode (Movement)

Temperature-Responsive Airflow: While the AC is in Miss Me mode and it simultaneously detects sudden human movement then the AI mode ensures that the AC works even smarter by adjusting in a deflected way, in order to maintain airflow as per the command given by its user.

Find Me / Miss Me feature elevates cooling to the next level, delivering a seamless, adaptive experience that combines personalized comfort with intelligent technology.

DIRECT VOICE COMMAND 2.0

Enhance your comfort and convenience with our advanced Direct Voice Command feature, designed to simplify your air conditioning experience. In this, the user doesn't need an AC remote, mobile phone, data, Wi-Fi, or any smart interactive devices to operate the AC.

Just Say, "Hello Lloyd" or "Hey Lloyd".

Wake Word "Hello Lloyd" or "Hey Lloyd", Commands Supported:

100+
Commands

Control Options

POWER

TEMPERATURE

CAPACITY

FAN SPEED

AIR SWING

BABY MODE

NEW
2026
FEATURE

Gentle cooling for little ones.

Babies feel temperature differently. Lloyd's Baby Mode creates a calm, comfortable environment that's as gentle as your touch. It maintains a mild temperature (24–26 °C), lowers noise and balances humidity so your little one sleeps soundly.

Activate **Baby Mode** through **Havells One App**, from your smartphone.

BABY MODE FEATURES

Creates a safe, soothing, and comfortable environment for infants and toddlers.

Soft & Silent
Cooling

Health-Conscious
Airflow

Peace of Mind
for Parents

Minimizes direct air
contact to protect
sensitive skin & breathing

WHEN TO USE IT ?

- During naps and night sleep
- Whenever your baby is in the room for extended periods
- In nurseries, bedrooms or play areas
- Use it regularly to help your baby sleep better and longer

PARENT TIP:

Create a cosy sleep sanctuary by closing doors and windows, dimming lights and activating Baby Mode in the Air Conditioner.

This feature is available in select models only.

INDOOR AIR QUALITY (IAQ)

Indoor air pollution is a serious health concern, with indoor air quality (IAQ) is often ten times worse than outdoor environments. Addressing this, Lloyd presents Stunnair and Stellar Air Conditioners, designed to provide a fresh and clean breathing environment.

These smart ACs not only regulate room temperature but also improve air quality. The Ambi-Lighting strip on the AC panel displays real-time IAQ and PM_{2.5} levels with intuitive color indicators, offering instant updates at a glance.

Equipped with IntelliSensor technology, Lloyd’s Stunnair & Stellar ACs feature advanced AI-powered sensors that deliver unmatched real-time air quality detection with exceptional accuracy and sensitivity.

KEY SENSING CAPABILITIES:

Indoor Air Quality (IAQ) and PM_{2.5} Levels:

Continuously monitors air quality, ensuring a clean and healthy environment.

Volatile Organic Compounds (VOCs):

Detects harmful pollutants that can impact indoor air safety.

Carbon Dioxide (CO₂):

Monitors CO₂ levels to maintain optimal air quality and alert users to any alarming concentrations.

Indoor Temperature:

Accurately senses room temperature for precise climate control.

Indoor Humidity Levels (Relative Humidity):

Tracks humidity levels to enhance comfort and prevent issues related to excess moisture.

HIGH CO₂ ALERT

Lloyd’s Stunnair & Stellar Air Conditioners continuously monitor CO₂ levels in the room, even when not actively cooling. The system detects alarming CO₂ concentrations and promptly alerts users via the Havells One App. For immediate visual feedback, the ambi-lighting turns red when CO₂ levels are elevated. Users are then advised to open doors and windows for adequate air circulation to help lower the CO₂ concentration.

IN INDUSTRY

PRECISION CONTROL SMART 4 WAY SWING

Lloyd's Stellar Air Conditioners are equipped with precision air swing control in which by adjusting the Horizontal Swing and Vertical Swing settings, users can precisely control the air flow, ensuring it reaches exactly where they want it.

4-STEP

Horizontal Swing Adjustment

- H - SWING offers 4 airflow options, when "H - SWING" key is pressed, Horizontal Swing flows air in 50° angle
- On each press of H - SWING button, swing icon works as per the cycle shown:-

H-Swing will works in following Cycle:

- 1st press H-Swing button
Auto Swing - All
- 2nd press H-Swing button
Left
- 3rd press H-Swing button
Center
- 4th press H-Swing button
Right

9-STEP

Vertical Swing Adjustment

- V-Swing offers 9 airflow options, when "V- SWING" key is pressed, Vertical Swing flows air in 0° ~ 90° angle from its installed position.
- On each press of V- SWING button swing icon works as per the cycle shown:-

V-Swing will works in following Cycle:

- | | | |
|--|--|--|
| 1st press V-Swing button
Auto Swing - All | 4th press V-Swing button
Middle | 7th press V-Swing button
Auto Swing 1-2-3 |
| 2nd press V-Swing button
Top | 5th press V-Swing button
Lower Middle | 8th press V-Swing button
Auto Swing 2-3-4 |
| 3rd press V-Swing button
Upper Middle | 6th press V-Swing button
Bottom | 9th press V-Swing button
Auto Swing 3-4-5 |

PREMIUM REMOTE HANDSET

The new remote handset is equipped with an I-Feel sensor in which the remote senses the real-time room temperature around it and transmits infrared signals to the AC indoor unit. It then adjusts its operation to achieve the desired room temperature.

- **One Click** on Ai Button for "Find Me Mode"
- **Two Clicks** on Ai Button for "Miss Me Mode"
- **Three Clicks** on Ai Button for "Putting Ai Mode Off"

- Premium Aesthetic
- Dedicated buttons for special commands
 - Ai Smart Mode
 - Air Purification
 - 1 Unit / Night
 - Ice Clean
 - DG Mode
- Remote with real-time clock
- Minimalistic LCD Icons
- Coloured Negative LCD Display
- Keypad band with Backlight
- Most common buttons as always visible
- Hidden Keypad for additional features
- I-Feel Sensor
- Remote with touch Sensor

*Features may vary from model to model.

MULTI-DIRECTIONAL AIR DELIVERY MECHANISM

M.A.D.M. (Multi-directional Air Delivery Mechanism) is a unique and innovative double-louver design that enhances the air delivery experience for users. It optimizes area coverage and airflow by targeting specific zones, delivering significantly superior performance compared to conventional louvers.

With 20% more air-suction area, STUNNAIR can deliver 10% more airflow in no extra time. This advanced system also offers features such as independent louver movement, high-speed air throw, focused cooling for hot zones and Air Throw at a 90° angle.

MADM delivering precise air at multiple angles

Conventional Air Delivery

• Shower Cooling:

In cooling mode, the air can be directed toward the ceiling, creating a gentle cascade of cool air that envelops the room. This "Shower Cooling" effect enhances overall comfort by promoting even temperature distribution and reducing direct drafts.

• Waterfall Heating:

Conversely, in heating mode, the double louvers can direct warm air toward the floor, facilitating a "Waterfall Heating" effect. This method warms the room from the ground up, ensuring a cozy atmosphere and reducing cold drafts at the same time.

With this dual functionality, Lloyd's double louver technology maximizes airflow efficiency, making every corner of your space more comfortable, regardless of the season.

ICE CLEAN

Cool air, effortless care.

With a single press, Lloyd's Ice Clean Technology deep-cleans your AC's evaporator coil. A three-phase cycle freezes, flushes and dries the coil, washing away dust, mould and bacteria without you lifting a finger.

Enjoy cleaner air, enhanced cooling efficiency and low maintenance – just press Ice Clean once a week for best results.

NEW
2026
FEATURE

ICE CLEAN FEATURES

An advanced self-cleaning technology that flushes out dust, mold, and bacteria from the indoor unit's evaporator coil using condensed water:

Improved Air
Quality

Enhanced Cooling
Efficiency

Low
Maintenance

HOW IT WORKS ?

Once activated from the remote, the AC goes into standby mode, thereafter enters self-cleaning cycle that lasts approximately 25 minutes, consisting of three automated phases:

- Frosting / Freeze (10 min - 11 min) - The coil ices over, trapping dust, mould and bacteria.
- De-Frosting / Melt & Flush (3 min - 4 min) - Ice melts, flushing away all trapped impurities.
- Drying & Protect (5 min - 6 min) - The coil dries completely to prevent moisture & odour.

Stage - 1
Frosting
(10 min ~ 11 min)

Stage - 2
De-Frosting
(3 min ~ 4 min)

Stage - 3
Drying
(5 min ~ 6 min)

BENEFITS:

Lesser damage to
Air Conditioner

Lesser chances of
refrigerant leaks

Less maintenance
requirement

Better cooling efficiency
and performance.

Cleaner, healthier air
for your family

Better Odor
Control

DIESEL GENERATOR MODE (DG)

NEW
2026
FEATURE

Never stop cooling, even when power does.

Power outage is quite a concern in many places. To your rescue, Lloyd has come up with a unique feature named DG Mode for such problems. When power outages strike, your Lloyd AC keeps running smoothly on generator power through DG Mode in which AC adapts intelligently, maintaining stable voltage, protecting components and maximizing efficiency. Stay cool and comfortable, even off the grid.

DG MODE FEATURES

In DG Mode, Air conditioner adjusts to deliver optimum cooling with minimal energy consumption.

Uninterrupted
Comfort

Optimize Cooling
Performance &
Energy Usage

Extended
Backup Time

WHAT IT DOES ?

- Optimised for generators – runs smoothly on DG power without overloading.
- Energy efficient – optimized cooling with minimal energy/power consumption.
- Voltage stable – stays steady even when generator output varies.
- AC protection – prevents overload and extends your AC's life.

HOW IT WORKS ?

Once the Power Supply is switched to DG or inverter backup, press DG button on remote immediately.

Set temperature:
Preset

Fan speed & air direction:
Pre-optimised for efficiency

Display: 'dg' icon
appears on unit & remote

Auto-exit: Returns to your
previous mode when main
power resumes

WHY IT MATTERS ?

- Seamless cooling during power cuts
- Enhanced compatibility and reduced strain on DG or inverter backup
- Longer AC lifespan and diesel savings
- Usage tips – use only during generator operation hours, keep doors and windows closed, and service your generator regularly

Cooling made stunning.
Décor made spectacular.

LLOYD Stylus

ONE STUNNING AC. MANY SPECTACULAR LOOKS.

Have you ever thought of changing your AC whenever you change your wall paint, flooring, or curtains? "Yeah, not really," as that adds significant expense to your budget for building a house or even for renovations. But Lloyd has made it very easy to do with its **"India's 1st Designer AC: Stylus"**. This model features a unique DIY (Do It Yourself) option for changeable fascias, allowing you to easily choose or change the AC's appearance to match your interior décor, whether it is wall paint, flooring, or even curtains. That's not all. You can even change the look or fascia of the AC whenever you feel like, choosing from the multiple options of coloured, marble, or wood panels available in the range.

Lloyd's Stylus is a smart AC in the truest sense, which, besides having built-in Wi-Fi, also has many other unique and important features. These include Automatic Humidity Control and a 6-in-1 Convertible AC, allowing you to adjust the unit's capacity depending on the required cooling, i.e., the heat load.

1

Detach front fascia

2

Choose from beautiful fascias
(Wood & Marble)

3

Attach chosen one

MARBLE

WOODEN

COOLS UP TO 60 °C

Lloyd's Air Conditioners define cooling performance with an exceptional ability to operate efficiently even in extreme ambient temperatures of up to 60 °C. Heat Pump feature is also available in a few models to cater to extreme winters of colder areas / hilly terrains.

6 IN 1 EXPANDABLE AC

The 6-in-1 Expandable AC feature offers unmatched versatility, adapting seamlessly to your cooling needs. With the ability to boost cooling capacity by up to 120%, this AC ensures optimal comfort across various room sizes and even weather conditions, delivering a tailored experience for any environment. To maintain robust performance and cooling comfort in extreme summers a few models are designed to perform at up to 120% of cooling capacity with their unique feature of 6-in-1 Expandable AC.

RAPID COOLING: 18 °C IN 30 S*

Lloyd's STUNNAIR is all set to stun its users with its even faster cooling. STUNNAIR brings down the grill temperature to 18 °C in 30 seconds. This AC starts cooling in 50% less time and brings temperature down in 33% less time when compared to regular inverter ACs.

18 m* LONG AIR THROW

With a bigger indoor size and a wider outlet, cool air reaches the farthest points of the room, making this an ideal AC for larger rooms.

OPEN DOOR DETECTION

Lloyd's Air Conditioners come equipped with a smart open-door detection system. When the AC detects a sudden drop in cooling efficiency, it identifies this as a possible result of open doors or windows. The AC promptly alerts the user with a beep alarm and sends a push notification via the Havells One App, helping to maintain optimal performance and energy efficiency by addressing cooling loss.

I- FEEL SENSOR

The new remote handset is equipped with I-Feel sensor which senses real-time room temperature around it and transmits infrared signals to the AC indoor unit, which then adjusts its operations to achieve the desired room temperature around the remote.

VOICE & Wi-Fi ENABLED

Lloyd Luxuria Collection are equipped with the voice control feature which makes it convenient for users to control the AC by voice commands through Alexa, Google Home, and other smart interface devices. Also, with HAVELLS ONE APP, you can now manage your Lloyd Wi-Fi AC from anywhere, any time with just a tap on your smartphone.

SMART 4 WAY SWING

With the Smart 4-Way Swing through horizontal and vertical louvers, this AC spreads cool air uniformly across the room, making the room cool and comfortable.

CLEAN FILTER INDICATION

Lloyd Inverter Split ACs make maintenance easy with **Filter Cleaning Reminder**. When it's time to clean the air filter, the AC's indoor panel will display "**CL**" symbol, giving you prompt for necessary action. This alert helps you maintain peak cooling performance, reduces unnecessary load on the AC and extends its life at the same time.

*We can redefine Filter Cleaning "AI Clean Filter" notification through Wi-Fi connectivity.
Filter Health Detection and Notification to User through the Havells ONE APP.

TURBO COOL

Yes, in just 1 Click you will get **Turbo Cool** air from Lloyd Inverter Split ACs. Once activated, the compressor starts immediately, delivering rapid cooling for **60 minutes**. If the set temperature is 16 °C, Turbo mode continues uninterrupted; otherwise, the AC returns to its previous settings automatically. It's fast, efficient, and perfect for quick relief from the heat.

100% PERFORMANCE. ZERO DERATING. EVEN IN EXTREME HEAT.

NEW
2026
FEATURE

Lloyd's Inverter Split ACs are engineered to deliver uncompromised cooling even when the outdoor temperature soars.

Lloyd is the first in the industry to achieve sustained peak cooling at such high ambient temperatures across the entire 5-Star and 3-Star Inverter Split AC range.

COOL EVERY CORNER WITH EASE. DISCOVER LLOYD'S WINDOW TOP THROW INVERTER AC.

Engineered to provide a next-level cooling experience, robust performance while maintaining energy efficiency, Lloyd's Masterpiece delivers uniform cooling with its new top air discharge. This power-packed Wi-Fi AC comes with amazing features like Opti-Breeze, Quiet Operation, Wider Air Throw, Feather Touch Control, making it perfectly suitable for any apartment, office, or bedroom, this model seamlessly combines next-gen technology, powerful cooling, and long-lasting durability in a sleek and modern design.

LLOYD'S MASTERPIECE :: RELIABLE COOLING, EFFORTLESS COMFORT

Designed to perform, built for efficiency, Lloyd's Masterpiece offers a perfect solution for cooling large and medium spaces with ease. This next-gen Wi-Fi Top Throw Inverter AC offers powerful cooling, long-lasting durability, modern design, which makes it ideal for apartments, office rooms, and compact areas.

POWERFUL COOLING PERFORMANCE

This 6 in 1 Convertible Window AC is equipped with a high-performance compressor, Lloyd's Masterpiece provides rapid cooling even @ 52 °C ambient temperature, reaching optimal temperatures faster while evenly distributing cool air across the room for a refreshing environment.

OPTI-BREEZE

Lloyd's Masterpiece is equipped with a unique feature of Opti-Breeze in which air throw of the AC can be converted in form of wind (optimum breeze), through a shift in its horizontal louvers.

ROBUST BUILD AND SLEEK DESIGN

The top-throw airflow design ensures that cool air reaches every corner, maximizing air circulation. Its compact form and minimalistic look make it a suitable addition to any room décor.

ENERGY EFFICIENCY

With an eco-friendly design, this 5 Star Rated AC delivers efficient cooling at a lower energy cost, helping to keep electricity bills manageable without sacrificing comfort.

QUIET OPERATION

Enjoy the cool comfort of this AC without any noise distraction, thanks to advanced noise-reduction technology, making it ideal for both home and office environments.

SMART CONTROL OPTIONS

Enabled with smart controls, this Wi-Fi AC allows you to adjust temperature, mode, and other settings from your smartphone, as well, offering convenience and flexibility at your fingertips. It also has a feather touch control panel for easy manual operations.

With a blend of **efficiency, durability, and modern design**, Lloyd's Window Top Throw Inverter AC is crafted to bring a cool comfortable experience to your space while providing value for years to come.
